

U.S. Patent Application of MAEDA
Serial No.: 09/111,578
Art Unit: 2878

Ben
deck chassis and a branch portion extending sideways from the pillar portion. In order to detect the leading ends and trailing ends of the magnetic tape, the pillar portion guides the light coming from the light emitting element into the cassette arranged on the deck. The branch portion, above the deck chassis, guides one portion of the light incident to the pillar portion to the reel on the deck chassis. The rotation of the reel is detected by receiving the light by the light receiving element on the main substrate through the opening point provided in the reel and the opening provided in the deck chassis. –

IN THE SPECIFICATION:

Please amend the specification as follows.

Page 2, line 4, change “DETAILED DESCRIPTION OF THE INVENTION” TO –
BACKGROUND OF THE INVENTION – ;

Page 2, line 8, change “BACKGROUND OF THE INVENTION” to – DESCRIPTION
OF PRIOR ART – .

Page 2, line 9, delete “the”;

page 2, line 9, change “deck,” to – decks – ;

page 2, line 9, after “leading” insert – end – ;

page 2, line 11, change “the” to – a – , first instance;
